Say yes to more. *Know what you said yes to.*

I read all 454 PalmPay reviews from 2026 rated 1 to 3 stars and tagged each by hand, then compared PalmPay with five Nigerian money apps. Transfers are rarely the problem. Almost 1 in 3 clear complaints is about a loan: credit people didn't choose, costs they weren't shown, and collectors who threaten them. I designed the fixes inside PalmPay's and FlexiMFB's current screens, with a working prototype, a film and the system in code.

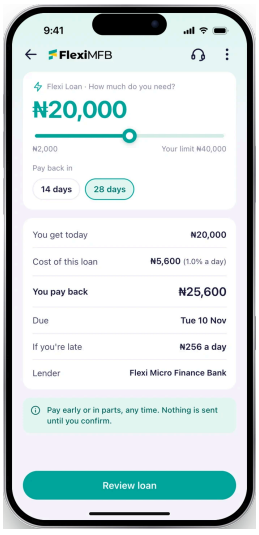

419 CLEAR COMPLAINTS, BY THEME

Loans (Flexi)	**132**
Money stuck after a debit	61
Can't get in, app fails	59
Debits they didn't agree to	38
Frozen accounts, locked savings	35
Customer service	29

IN A CUSTOMER'S WORDS

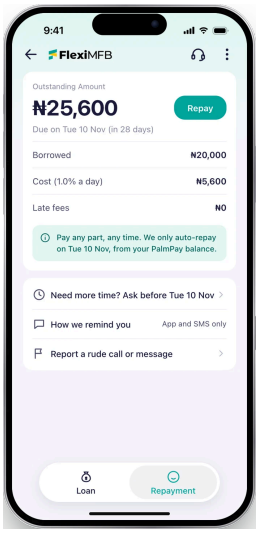

> “I press the borrow button hoping to proceed to next page where I can input the amount I want to borrow.. Instead of the payment I put page I was credited #339,000”

PalmPay customer, Google Play, August 2026 · Latest 500 App Store reviews: 32% are 1 to 2 stars for PalmPay, 17% for OPay

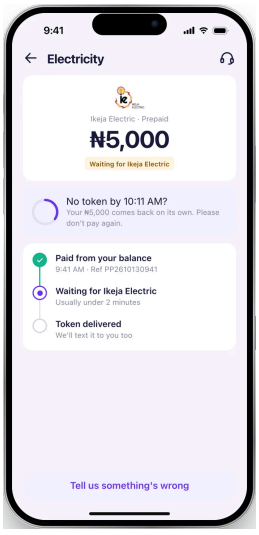

1 · Choose the amount, see the cost

FlexiMFB's own screen: what you pay back, the due date, the late fee and the lender, before anything is sent.

2 · What you owe, and why

The Repayment tab with the breakdown, part payments, "Need more time?" and "Report a rude call".

3 · A countdown, not a dispute

Every bill shows where it is, and when the money comes back if the biller stays silent.

Evidence, not opinions
454 reviews by hand and a six-app competitive scan.

Inside your system
PalmPay's live screens untouched; FlexiMFB's look kept.

I build what I design
React and Next.js. The system already runs in code.

Shipped for real users
Quote Request, live since Nov 2025. 1K+ downloads, 4.6 stars.
