# Pay. Unlock. Own it. *Then what?*

I read 1,176 Watu reviews from Kenya and Nigeria since January 2025 and tagged every clear complaint by hand. The loop breaks at two moments: right after the last payment, and while a paused phone waits for a payment to land. I designed the fixes inside Watu's current app, with a working prototype, a film and the system in code.

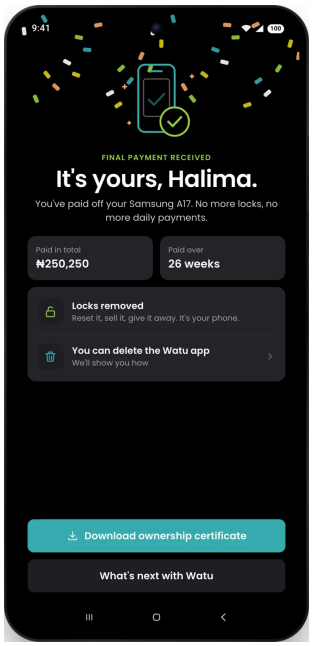

## 109 CLEAR COMPLAINTS, BY THEME

| | |
|---|---|
| What comes after the phone | 39 |
| Paying and unlocking | 28 |
| Getting in (codes, crashes) | 21 |
| Lost phone, ID misuse, warranty | 8 |
| Price | 7 |
| Support and agents | 6 |

## IN A CUSTOMER'S WORDS

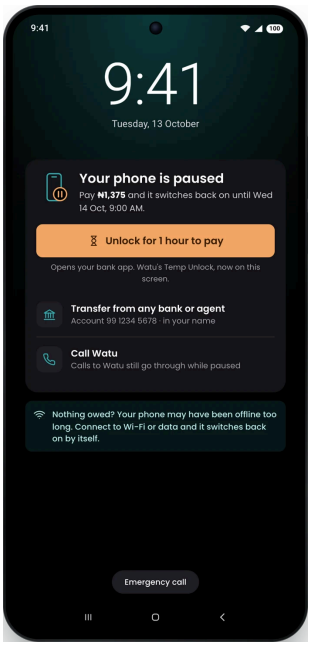

> "why did watu keep displaying complete your payment to unlock new features after completing it already"

Watu customer, Nigeria, Google Play, May 2026 · 20 of the 39 say they've already paid in full; 25 of 39 are from Nigeria

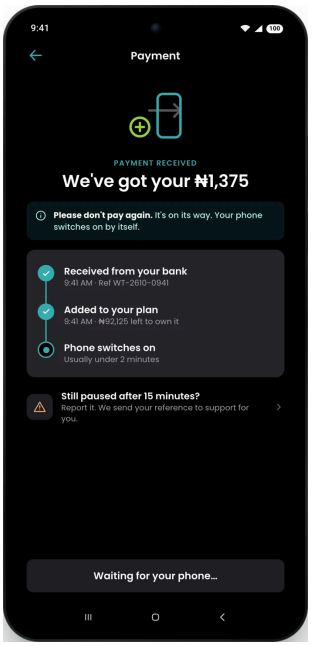

### 1 · The finish line

Total paid, locks removed, a certificate, permission to delete the app. Then an honest "what's next".

### 2 · The lock screen pays

What's owed, what it buys, Watu's own Temp Unlock up front, and an account number for any bank or agent.

### 3 · "Please don't pay again"

One tracker after every payment: received, added, switching on, with a reference and an expected time.

---

**Evidence, not opinions**
Two markets of reviews, Watu's replies and release notes.

**Inside your system**
Watu's colours, Poppins and five-tab app. No rebrand.

**I build what I design**
React and Next.js. The system already runs in code.

**Shipped for real users**
Quote Request, live since Nov 2025. 1K+ downloads, 4.6 stars.
